Subject: RE: comments on PID/ID boilerplate

The following edit works for me...

The methods developed as part of the joint Interim Approaches will continue to be vetted before EPA utilizes these methods broadly to meet its ESA obligations.

Understood. Were you ok with either/both of our suggested edits (we marked up the text and I provided an alternative to that in my marginal comments)?

Subject: RE: draft PID and ID ESA boilerplate language for chemicals with existing BiOps

Hi all,

The pendimethalin PID is going out the door in June and we wanted to modify the existing ESA boilerplate language to fit for chemicals with existing BiOps.

The following chemicals are affected by this draft language: **diazinon, malathion, chlorpyrifos, methomyl, carbaryl, glyphosate, atrazine, simazine, propazine, dimethoate, ethoprop, phorate, bensulide, naled, phosmet, 2,4-D, captan, linuron, chlorothalonil, diuron, triclopyr BEE, oryzalin, trifluralin, pendimethalin, thiobencarb, propargite, fenbutatin oxide, and diflubenzuron**

Please take a look at the attached. I've incorporated recent comments from Anita Pease and Mark Dyner.

Please send comments by Tuesday 6/13. I'm sending to a small group of people for now, but please forward on if I've omitted someone who should see this.

Thanks,

Khue Nguyen

Subject: RE: draft PID and ID ESA language for chemicals with existing BiOps

Folks,

I didn't hear back from anyone on this draft ESA language for PIDs and IDs (for chemicals
undergoing the interim approaches). Does this mean that you all love it and have no comments?
If not, please send me comments.

Subject: draft PID and ID ESA language for chemicals with existing BiOps

Hi all,

Ex. 5 - Deliberative Process

See draft language attached. I've written two versions, one for chemicals undergoing the interim approaches, and one for chemicals with existing BiOps but no current schedule for national-level consultations. Once we get comments from the smaller group here, we'll route for wider review in PRD.

Thanks,

Khue Nguyen
